

doForms in the Enterprise

doForms offers its simple and easy-to-use solution with enhanced functionality for the enterprise to ensure scalability and security, integrate into enterprise legacy systems, and provide the kind of value enterprises demand. Its enterprise functionality means doForms can be your single solution for the enablement of your mobile workforce.

The doForms for Enterprise Offering

doForms: Our flagship product, doForms eliminates the inefficiencies of paper-based data capture. Build mobile forms, manage users, view data and generate reports. Forms can be built in under an hour and uploaded to your mobile device in seconds and are fully customizable to suit your business needs. Features include:

- Forms, surveys and work orders
- Image, video and audio, with sketching capability
- Date and time stamp
- GPS stamp
- Credit/debit card payment capture
- Check boxes and radio buttons
- Data lookups with conditional filtering
- Barcode scanning and Near Field Capture (NFC) tag reading
- Excel plug-in
- Page breaks
- Calculations
- Signature capture
- Approval request
- Custom report template
- Email PDFs direct from form
- Self-scoring surveys

doForms is a highly robust and flexible mobile forms and workflow solution that lets you quickly, inexpensively, and non-disruptively move away from paper AND enjoy new benefits enabled through the powerful functionality of today's tablets and smartphones. Secure, compliant, yet flexible it's enterprise ready.

"The success and ease of use of this system is now being examined for other ways in which we can deploy a simple hand-held data collection system to the field. We have learned that we don't have to send "smart" people out to the field. So we can save money and training by having people who work on the collected data for analysis rather than doing heavy-lifting data work in the field. This also saves in the mobile device costs."

Pacific Gas and Electric Company.

doForms in the Enterprise

doForms for Enterprise also includes:

Dispatch: Enables the enterprise to streamline workflow and improve communication. Allocate work in real-time and track employee and job activity with rich two-way communications.

Scheduling & Tracking: Enables fast and accurate workforce management providing real-time location and mapping via GPS tracking and time and date-stamped record for compliance. Calendar function for at-a-glance scheduling and real-time work status updates. Includes intra-form real-time work status updates and remote form retrieval and update.

Enterprise Synchronization & Integration: Streamlines data entry time, eliminates error and data loss. Automates near real-time synchronization with back-office and IT systems. Leverages internal tools and skill-sets. Accelerates time to use of data for analysis. Integrates with these major operating systems, and more:

Platforms

- SAP/Sybase
- Salesforce.com
- Sage
- SharePoint

Databases

- Oracle
- MySQL
- SQL Server
- ODBC

Enterprise Encryption: Collect forms data from your mobile devices (smartphones, tablets, P/s) and place it securely into your core systems and behind your firewall. Provides transport encryption plus optional payload and at-rest encryption to meet the most stringent of requirements to keep the enterprise secure and compliant.

Enterprise Hosting: Host on-premises within your infrastructure, or let doForms host and support your server in the cloud on your own dedicated or shared servers.
