Networkfleet Integration

Mobile Forms Data and

Fleet Tracking Data – Better Together

Businesses of all sizes can now merge, manage and output mobile forms data from doForms along with fleet management diagnostics and tracking data from Verizon Networkfleet in the business systems they use every day.

verizon **Networkfleet**

doForms enables businesses to collect and disseminate data in the field – work orders, inspection reports, invoices, signatures, timesheets, surveys and more.

+

Verizon Networkfleet offers comprehensive vehicle tracking, with onboard diagnostics, odometer and temperature readings, roadside assistance, GPS coordinates and more.

doForms Sync & Save integration gateway and our Networkfleet interface module make it simple to combine data from both systems. Take advantage of our other Sync & Save modules and easily integrate your combined data with systems and software like Salesforce, QuickBooks, Oracle, Google Docs, SharePoint, Excel, SQL Server and more.

Imagine combining damaged package information from a delivery with hard stop data from your vehicle's onboard computer, or dispatching a mechanic to service a vehicle after it's traveled a preset number of miles. The possibilities are endless.

Supported Networkfleet data includes:

- Device Alerts
- Diagnostics
- Driver
- Driving Statistics

- GPS Messages
- GPS Trips
- Health Buffer
- Inspections

- Last Buffer
- Maintenance Alerts
- Sensor
- Service Records

- Vehicle
- Vehicle Attributes
- Vehicle Groups
